

Application No: 09/821,183  
Attorney's Docket No: US 010105

**IN THE CLAIMS:**

*Please find below a listing of all of the pending claims. The statuses of the claims are set forth in parentheses.*

1. (Previously Presented) A method for controlling a media player, comprising:  
  
    establishing at least one rule defining a predefined user activity, said rule including at least one condition and additional information external to a user, wherein the additional information external to said user includes a feature of media on said media player and said rule including an action item to be performed to automatically adjust said media player when said rule is satisfied;  
  
    analyzing at least one of audio and video information focused on said user to identify said condition; and  
  
    performing said action item if said rule is satisfied.
2. (Original) The method of claim 1, wherein said user activity suggests that said user is not paying attention to said media player and said action item is the issuance of a command to pause said media player.
- 3 (Original) The method of claim 1, wherein said user activity suggests that said user is not paying attention to said media player and said action item is the issuance of a command to said media player to begin recording.

Application No: 09/821,183  
Attorney's Docket No: US 010105

4. (Original) The method of claim 1, wherein said user activity suggests that said user is not paying attention to said media player and said action item is the issuance of a command to said media player to enter a power save mode.
5. (Original) The method of claim 1, wherein said user activity is a predefined gestural command and said action item is the issuance of a corresponding command to said media player.
6. (Previously Presented) A method for controlling a device, comprising:
- analyzing at least one of audio and video information focused on a user to identify at least one predefined user activity;
  - analyzing additional information external to a external user, wherein the additional information external to said user includes a feature of media on said device; and
  - performing a predefined action item to automatically adjust said device based on said additional information when said user activity is identified, wherein the predefined activity is not related to controlling the device.
7. (Previously Presented) The method of claim 6, wherein said device is a media player; and
- said user activity suggests that said user is not paying attention to said media player and
  - said action item is the issuance of a command to pause said media player.
8. (Previously Presented) The method of claim 6, wherein said device is a media player; and

Application No: 09/821,183  
Attorney's Docket No: US 010105

said user activity suggests that said user is not paying attention to said media player and said action item is the issuance of command said media player to begin recording.

9. (Previously presented) The method of claim 6, wherein said device is a media player; and said user activity suggests that said user is not paying attention to said media player and said action item is the issuance of a command to said media player to enter a power save mode.

10.(Cancelled)

11. (Previously Presented) A system for controlling a media player, comprising:

a memory for storing computer readable code; and

a processor operatively coupled to said memory, said processor configured to:

establish at least one rule defining a predefined user activity, said rule including at least one condition and an action item to be performed to automatically adjust said media player when said rule is satisfied;

analyze at least one of audio and video information focused on a user to identify said condition;

analyze additional information external to said user, wherein the additional information external to said user includes a feature of media on said media player; and

perform said action item based on said additional information if said rule is satisfied.

Application No: 09/821,183  
Attorney's Docket No: US 010105

12. (Original) The system of claim 11, wherein said user activity suggests that said user is not paying attention to said media player and said action item is the issuance of a command to pause said media player.
13. (Original) The system of claim 11, wherein said user activity suggests that said user is not paying attention to said media player and said action item is the issuance of a command to said media player to begin recording.
14. (Original) The system of claim 11, wherein said user activity suggests that said user is not paying attention to said media player and said action item is the issuance of a command to said media player to enter a power save mode.
15. (Original) The system of claim 11, wherein said user activity is a predefined gestural command and said action item is the issuance of a corresponding command to said media player.
16. (Previously Presented) A system for controlling a device, comprising:
- a memory for storing computer readable code; and
  - a processor operatively coupled to said memory, said processor configured to:
    - analyze at least one of audio and video information focused on a user to identify at least one predefined user activity;
    - analyze additional information external to said user, wherein the additional information external to said user includes a feature of media on said device; and

Application No: 09/821,183  
Attorney's Docket No: US 010105

perform a predefined action item based on said additional information to automatically adjust said device when said user activity is identified, wherein the predefined activity is not related to controlling the device.

17. (Previously Presented) The system of claim 16, wherein said device is a media player; and said user activity suggests that said user is not paying attention to said device and said action item is the issuance of a command to pause said media player.

18. (Previously Presented) The system of claim 16, wherein said device is a media player; and said user activity suggests that said user is not paying attention to said media player and said action item is the issuance of a command to said media player to begin recording.

19. (Previously Presented) The system of claim 16, wherein said device is a media player; and said user activity suggests that said user is not paying attention to said media player and said action item is the issuance of a command to said media player to enter a power save mode.

20. (Cancelled).

21. (Previously Presented) An article of manufacture for controlling a media player, comprising:

a computer readable medium having computer readable code means embodied thereon,  
said computer readable program code means comprising:

a step to establish at least one rule defining a predefined user activity, said rule including at least one condition and an action item to be performed to automatically adjust said media player when said rule is satisfied;

Application No: 09/821,183  
Attorney's Docket No: US 010105

a step to analyze at least one of audio and video information focused on a user to identify said condition;

a step to analyze additional information external to a user, wherein the additional information external to said user includes a feature of media on said media player; and

a step to perform said action item based on said additional information if said rule is satisfied.

22. (Previously Presented) An article of manufacture for controlling a device , comprising:

a computer readable medium having computer readable code means embodied thereon, said computer readable program code means comprising:

a step to analyze at least one of audio and video information focused on a user to identify at least one predefined user activity;

a step to analyze additional information external to a user, wherein the additional information external to said user includes a feature of media on said device; and

a step to perform a predefined action item based on said additional information to automatically adjust said device when said user activity is identified, wherein the predefined activity not related controlling the device.
